Quando foi a última vez que experimentou
algo pela primeira vez?

FESTAS DE BACO

O design ousado e a capacidade de bem receber qualificam o hotel The Vine como lugar de convívio e bem-estar, um hino aos sentidos e aos prazeres da vida.

Membro dos Design Hotels, esta unidade de cinco estrelas possui a assinatura dos conceituados arquitectos Ricardo Bofill e João Francisco Caires.

Os aposentos, 57 quartos e 22 suítes de luxo, estão distribuídos por quatro pisos, um para cada estação do ano, porque o vinho depende dos ciclos da Natureza.

Funchal Situated in the historic center of Funchal, near the marina and the Sé Catedral, the hotel The Vine offers a gourmet restaurant, a spa with vinotherapy, panoramic pool and jacuzzi, a fitness center, and an event and meeting room with space for 100 people. Member of Design Hotels, this five-star unit has the signature of the renowned architects Ricardo Bofill and João Francisco Caires, as the interiors are the work of the award-winning designer from Madeira, Nini Andrade Silva.

The apartments, 57 rooms and 22 luxury suites, are distributed over four floors, one for each season of the year, because the wine depends on the cycles of Nature, from the time of the harvest to the stage of maturation of the drink. Thus, one of the floors is dedicated to Spring, with rooms in shades of green; the next, to Summer, dominated by red; then, to Autumn, in shades of brown; and finally, to Winter, in shades of grey.

The restaurant and the spa The Vine follow a common philosophy and seek to enhance what Nature offers, then transform and use it in an inventive way, with the intuition of pleasing, seducing. The restaurant The Vine serves gourmet kitchen with the supervision of chef Antoine Westermann, distinguished with three Michelin stars. The sophistication of the French and the inspiration from Madeira result in a surprising fusion of cuisines. For being located on the top floor of the hotel, the restaurant The Vine offers a panoramic view of Funchal that adds sophistication to this experience.

In the spa, also on the top floor, the treatments and massages benefit from the well-known properties of grapes. Using aesthetic and therapeutic innovations, the brand TheraVine, of vinotherapy, collects its products from the vineyards of indigenous people from South Africa.

Beyond the compounds present in the grape seeds, such as polyphenols, with well-known anti-oxidant and protective effects, the properties and active principles existing in the grape leaves and other vine materials, fighting free radicals and acting as anti-aging therapy.

Thus, a massage with oils extracted from the grape leaves, a exfoliation with the seeds of the grape or a session of jacuzzi with red wine are delicious similar to the sugar of the ripe grapes.

Because just like a glass of red wine every day, the pleasures of a good spa also make a very good heart. Located on the top of the building, framed between the sea, the city and the mountains, the heated pool is, literally, one of the high points of the hotel. On the side is the Bar 360, thus called for its stunning views.
